

SERIES 'ST' MAGNETIC COUPLED PUMPS

RELIABLE, TROUBLE-FREE PUMPING

**SEAL-LESS AND "LEAK-PROOF" FOR
TOTAL SOLUTION CONTAINMENT**

- **Corrosion Resistant:**
- **Polypropylene – Max 85°C**
- **PVDF – Max 90°C**
- **Non-metallic solution contact**
- **Flow Rates to 800 l/min**
- **Discharge Heads to 37 m**
- **EX Stock Availability**
- **Limited Run-Dry* Capability**

SERIES 'ST' Magnetic Coupled Pumps are seal less, providing for low maintenance, trouble-free and "leak-proof" operation.

The impeller magnet assembly floats in the radial magnetic field set up by the motor driven external drive magnet.

Improved developments in materials technology such as the more thermally stable "PPS" material enable these pumps to be Run-Dry* for limited periods up to 1 hour.

However we still recommend incorporating a Motor Load Monitor for TOTAL Run-Dry Protection (Request Bulletin

A-313). This also enables detection of conditions such as:- Cavitation, Loss of Prime, Closed Discharge Valve, Blocked Filter Cartridges and Damaged Impeller.

The standard diameter impeller is suitable for water-like liquids to 1.2 SG. Liquids having a higher specific gravity, up to 1.8 can be pumped if : the overall diameter of the impeller is reduced, the outlet flow is restricted , or the restrictions from the filter or other head loss is sufficient to keep the impeller magnet in synchronisation.

To order pump without motor, DELETE final part of Model No. and last two digits of Code No-

Example: Model ST 11/2 x 1-MPCK-6 Code: 01-7206

NOTE: To specify PVDF Models -
Change **P** to **K** in Model Number
e.g. ST1/2 x 1/2 - **MKCK**-3-CM180
Add **K** to Code Number e.g. 01-7203**K**
