# SERFILCO®

Global Products, Local Service & Advice You can Rely on

## ***Flying High in Aerospace***

**SERFILCO Pumps, Agitation Systems , Filter Chambers, Filtration Systems, Filtration Media, and Replacement Parts .**

# Pumps, Filters & Airless Agitation for Surface Treatment

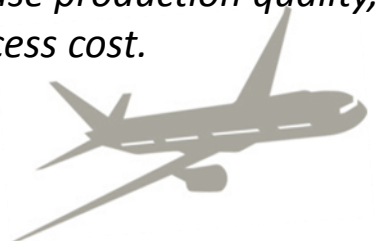

*SERFILCO is a leading global manufacturer of advanced thermoplastic and stainless steel chemical pumps, filters and agitation systems. A choice of construction materials and innovative design means the range can be used to pump a wide array of liquids including acids, bases, corrosive and flammable liquids, inorganic liquids, liquids with entrained gases, organic liquids, slurries, solvents, toxic liquids and viscous and volatile liquids*

*SERFILCO products have gained global approval for recirculation purification of electroplating and chemical process solutions. They have proven to be a reliable workhorse for over half a century.*

*With numerous systems in service in the Global Aerospace Industry, you can be confident a SERFILCO System will improve the clarity of your process solutions, increase production quality, and reduce process cost.*

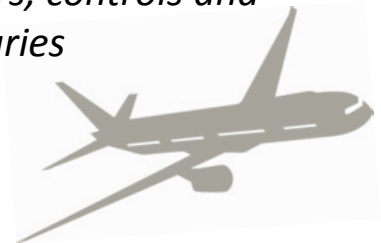

# Equipment for the Toughest Chemical Applications

*SERFILCO supplies equipment to the global aerospace industry, and have a loyal customer base who are at the forefront of aerospace technology and innovation. SERFILCO's innovative equipment is employed on some of the most arduous processes used in the plating industry. Nickel Sulphamate, Cadmium Cyanide, Hard Chrome, Hot Caustic Cleansers, HF/Nitric Etch, Hard and Tartaric Sulphuric Anodising processes have all been improved using SERFILCO engineered equipment.*

- *In tank and out-of-tank filters for cleaning, etching, plating and rinse tanks*
- *Pumps for process circulation, chemical transfer, effluent treatment plants*
- *Airless agitation systems for chemical baths*
- *Vertical pumps for reliable fume scrubber operation*
- *Filters for NDT rinse water purification*
- *Heaters, controls and ancillaries*
