Serfilco is committed to meeting customers' needs, along with the increasingly stringent legislative controls regarding safety and pollution, and to reducing waste in all forms, whether it is project rejects or a by-product of the process. Serfilco continues to develop state-of-the-art filtration, liquid handling, water and waste treatment equipment to help customers achieve the quality and cost savings they need to be competitive in the world marketplace.

Quality chemical processing and waste treatment products built to last from SERFILCO®

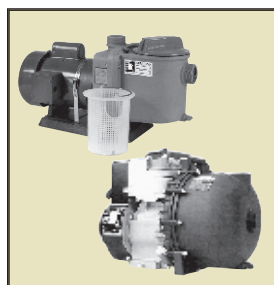

HORIZONTAL CHEMICAL PUMPS

SERFILCO offers pumps in PVC, polypropylene, CPVC, PVDF, GRP, Noryl® and Ryton® for outstanding chemical resistance and non-metallic solution contact. With "Aqua Seal" or magnetic coupling.

PRESSURE FILTER CHAMBERS

SERFILCO filter chambers are available in metallic or non-metallic materials to provide chemical compatibility with the solution to be treated. Available in a range of sizes, they also provide the capacity to handle the volume of solution to be treated.

SELF-PRIMING CENTRIFUGAL PUMPS

SERFILCO corrosion resistant plastic or stainless steel pumps can be used to transfer chemicals, solvents, sludge, slurries and waste from industrial applications. Available with electric, air, hydraulic or gas engine drive.

CARBON PURIFICATION

SERFILCO offers a range of chambers and complete systems for the removal of organic materials from waste streams. Models are available for use with carbon cartridges or granular carbon in canisters or bulk form..

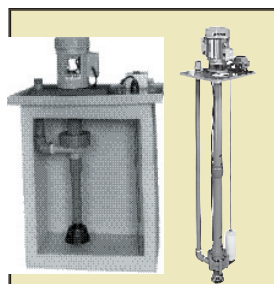

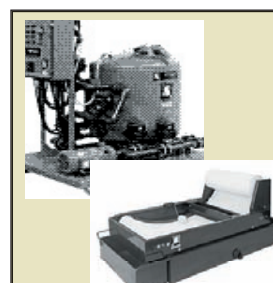

AIR DIAPHRAGM PUMPS

SERFILCO air diaphragm pumps are ideal for many solution transfer and process applications. They are self-priming and can handle any product that pours including abrasive and chemically aggressive liquids, metallic and plastic models available.

FILTRATION SYSTEMS

SERFILCO offers a range of filtration systems for use with cartridge, disc, sleeve, bag or permanent filter media. They can be installed for in-line or recirculatory filtration, as required.

CHEMICAL SUMP PUMPS & PUMP STATIONS

SERFILCO sump pumps are available in lengths from 1 m to 3.5 m. Collection and pumping stations offer the most economical and reliable means of collecting and transferring corrosive or hazardous wastes that need to be held for batch transfer and are not allowed to go down municipal drains.

pH & ORP METERS, CONTROLLERS, RECORDERS

SERFILCO offers a complete line of pH meters as well as conductivity meters to maintain rinse water quality and conserve water; and metering pumps for monitoring, controlling and recording the pH or ORP of process solutions and waste streams.

DRUM PUMPS

Drum pump tubes come in a variety of materials, including new CPVC. Interchangeable motors are available with variable speed control for precise delivery without splash back. SERFILCO Smart Batch Control Pumps are engineered to dispense of liquid with accuracy to 0.5%.

REPLACEMENT MEDIA

We stock depth wound, membrane, pleated paper, porous stainless steel and custom cartridges suitable for most filter vessels. Maxi-Depth type cartridges are offered in 4" to 40" lengths and from sub-micron to 200 micron retention. Bulk carbon and carbon cartridges, Fuller's Earth, bags, discs and disc sets are also available.
