## HARD CHROME PLATER'S

Let SERFILCO engineer an airless eductor agitation system for you using over 15 years of design experience.

### SER-DUCTOR AGITATION SYSTEMS

- Reduce fume scrubber extraction costs
- Reduce airborne emission up to 90%

### SERFILCO FILTRATION SYSTEMS

won't help you reach PEL levels, but they will prevent sludge from accumulating and reduce or eliminate rough deposits.

**HI-PERF CARTRIDGES** — preferred cartridges for hexavalent chrome filtration.

**LET US SEND YOU A SAMPLE CARTRIDGE**

## DECORATIVE CHROME PLATERS

### SWITCHING TO TRIVALENT CHROME?

- **SERFILCO** can supply you with the filtration, agitation and purification systems necessary to obtain optimum performance from your tri-chrome process.

- **SERFILCO** will supply a system that is compatible with sulfate or chloride baths.

- **SERFILCO** will supply you with an eductor agitation system designed for your specific tank layout.

- **SERFILCO** will supply you with an ION exchange resin chamber to effectively remove metallic contamination continuously, before it's necessary to batch treat.

**TRI-CHROME FILTRATION SYSTEM**

## ZINC PLATERS

### CONVERTING TO HEX FREE CHROMATE CONVERSION COATINGS?

**AGITATION** is required, to assist in bringing fresh solution to the interface. SERFILCO can design an eductor system to handle your specific applications.

**FILTRATION** is required to remove the white precipitate that cause roughness.

**ION EXCHANGE** will significantly extend the bath life by removing metallic contamination. Thus enhancing corrosion protection.
